

Biljana Blazevska Stoilkovska graduated from the Institute of Psychology at the Faculty of Philosophy, Ss. Cyril and Methodius University in Skopje in 2002. She earned her MA in 2008 (master thesis "The role of work values and career orientation in psychological contract formation") and received her PhD in psychology in 2012, at the Faculty of Philosophy in Skopje (doctoral dissertation "Decision-making in choosing the profession: indecision in choosing and deciding stages"). Biljana Blazevska Stoilkovska is assistant professor in Psychology Department at Faculty of Philosophy-Skopje. She teaches basic and advanced statistical methods, as well as courses from the field of work psychology. Her professional interest is focused on vocational identity and career development in adolescents and young adults, work relations in terms of the psychological contract, interplay between work and family roles as one of the most important social roles, stress management and health at work. She was involved in tests adaptation for professional selection purposes, in professional selection, in developing tests for the career centers in secondary schools, and trainings for statistical data processing in public opinion research. She has participated in many regional and international conferences and congresses. Currently she is involved in international research on work-family interface (balance and / or conflict and their correlates) and in study on gender stereotypes and career development in cross-cultural context.
