

Felicia Pratto is a professor of psychology at the University of Connecticut. She completed her PhD from NYU in 1988, was an assistant professor at Stanford University from 1990 to 1997, whereupon she joined the faculty at the University of Connecticut as an Associate Professor. Her research concerns social cognitive processes that contribute to group biases, intergroup relations, particularly power and the structuring of sexism and ethnocentrism, and international violence. She is a fellow of the APA and APS. She is (with Jim Sidanius) creator of *Social dominance theory* (http://en.wikipedia.org/wiki/Social_Dominance_Theory) multilevel theory which attempts to explain the stability of group-based social hierarchies and group-based inequalities in the world. This theory has provoked hundreds of empirical research all over the world and several thousands of papers in peer-reviewed academic journals.
