

Irena Teofilovic finished undergraduate studies in Psychology in 2010 at the Psychology program of the University in Banja Luka. During the same year she started the Master Degree at the aforementioned study program which was completed in 2013. Throughout the university she volunteered and trained in several institutions (the Psychiatry Clinics, the children without parental care center, schools, kindergartens), and participated in various seminars across the region. She was a participant in the science-professional conferences: “Students encountering science“ with international participation, “Banjaluka’s November meetings“, “Empirical researches in psychology“. She was an assistant in national identities and attachment researches (2010), as well as those on the existence of prejudice among the religious toward the people with HIV and AIDS (2011). The sphere of professional interest is related to issues of social and developmental psychology.
